RAINPROOF FABRICS AND PROCESSES

The 210D Oxford cloth, which is wear-resistant enough, is used as the tent fabric, which is enough to meet your rainproof needs for leisure camping. The double-enlarged sunroof cover also prevents water leakage from the top.

B3 anti-mosquito breathable mesh design

The previous monotonous tent design has been upgraded, and B3 mosquito-proof and breathable mesh is designed behind each door and window, which can effectively prevent outdoor mosquitoes from entering while opening and ventilating.

All-round rainproof, rainwater slides along the outside of the tent

All-round rainproof, rainwater slides along the outside of the tent

Strong rain/condensation protection

The advantage of the fully enclosed tent is that it can fully protect the interior of the tent from being contacted by rainwater. The material of 210D waterproof oxford fabric can also prevent condensation from entering

Can be used as gazebo, fishing shed,
canopy, etc.

Fully automatic tent three-use display

Fully automatic tent three-use display

1. Combination of inner & outer tents

Large space, can accommodate 3-4 people, double door design, 360° circulation and ventilation, and can cope with various outdoor environments freely

2. Outer tent single use (add ground cloth)

The outer tent can be used with ground cloth, can be used as a gazebo, awning, can accommodate at least 4 adults

3. Outer tent single use (plus struts)

The densely woven mesh is ventilated and breathable, and the tent can be used alone after taking out the pole to build the inner tent, which can accommodate at least 3-4 adults

Note: The standard version of this tent is dual-use, and the three-use model adds tent poles and ground cloth.

Spinning spring device

The umbrella-shaped skeleton is stable and strong, and has been pulled and pressed by the gravity test, without cracking or damage.

Open the tent

The spring device makes the tent particularly simple, and it can be stretched out easily.
